Good afternoon, David:

Mr. Kadoshnikov's meter was relocated to a free-standing H-frame structure approximately 30 feet from his residence. It is my understanding that the location of the meter structure was selected by Mr. Kadoshnikov and approved by the Company's zone engineer. While Mr. Kadoshnikov previously received service through a manually read meter ("MRM"), he unenrolled himself from the MRM Rider so that he could participate in net energy metering using solar panels. For that reason, he is now served by a smart meter. We hope this information is helpful.

Thank you,

Katie

To Katie Brown, Esquire:

Thank you for your e-mail of March 1, 2021, informing me that, at Mr. Kadoshnikov's request, his meter was moved.

It would be helpful, if you could provide more details. I would like to know where it was moved in relation to his residence, and how far it is located from his residence. Also, please provide the type of pole provided, and whether the meter provided is a smart meter. I would also like to know whether or not Mr. Kadoshnikov is now participating in net energy metering. Please provide any additional appropriate information in this matter. Please provide this information by the close of business on Monday, March 15, 2021.

Thank you for your consideration in this matter.

Regards,

David Butler
